

SCIENCE WARNING

The messages stated in class today may or may not be factual and should therefore be labeled as theoretical. We feel that it is not only necessary but our obligation to inform the public, uprooting the beliefs of our great society by mixing church and state. Upon examining our shallow scientific pool of knowledge we have concluded that everything that is not paralleling our deeply conservative American religious beliefs is now considered theoretical. Despite constant presentations of scientific fact, it is our pleasure to label the material discussed here today as theoretical for the benefit of keeping our tiny mindsets undisturbed.

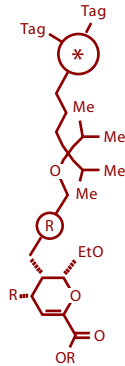

Thank you for considering our view.
